REPORTS

- by a group of Skořepová, Slámová, Víšková, Sirotková, Kubalová

There was the last flood in 2002. People have been scared since that disaster. Following flood has appeared this year. It started to rain on Saturday and it got worse and worse. People were scared and water still came up. People were building barriers to protect their houses and possession. The highest water came on Monday. Rescuers evacuated people from flooded places. Unfortunately, eight people died in water or thanks to water. Present flood effects all Europe. The worst it seemed to be in Germany. The situation is better now but water can come again....

WRITING

- by a group of Vávrová, Pechar, Kalinová

When the river got higher and higher, I was really scared. It was a mistake to build my house next to the river. Ducks were swimming towards my house. That situation was funny but I couldn't laugh. I knew - I had no money to build a new house and I didn't have a place to live. The fire-brigade workers have offered me a flat to stay. At that time there had already been three other people. I was happy to have a place to stay.....
